EQUINE
SOLUTION

Stalls

Animat offers exclusive interlocking stall kits that provide increased comfort and security for your horses.

Wash Bay

Since they are made from 100% recycled rubber and are non-porous, our mats are easy to clean and disinfect.

Alleys

Our mats offer superb traction and shock absorption, which helps eliminate stress on legs and joints.

Trailers

Animat provides excellent traction and security for your horses in either trailers or vans.

and more...

horse mat

Animat has been designing and manufacturing rubber flooring for over 30 years. During that time, we have developed rubber mats exclusively for horses that meet the specific requirements of today's modern facilities. Our interlock flooring system generates no dust and requires no special maintenance.

animattress III

NEW OFFER

For maximum comfort, we introduce Animattress lll interlocking stall kits for those individuals who want extra cushioning without risk of torn top covers getting caught on shod hooves. These mats are 1.25" thick with a strong, durable 3" wide support structure and alternating length cone "feet" on the underside for strength and resiliency.

Our famous pebble top surface offers superior traction over other surfaces. These individual interlocking mats provide a low-maintenance alternative to other stall "mattress systems" while giving your horses the comfort they deserve.
