

Advance Your Dairy Operations

HELPING FARMERS TAKE CARE
OF THEIR ANIMALS

Thickness
1" (25mm)

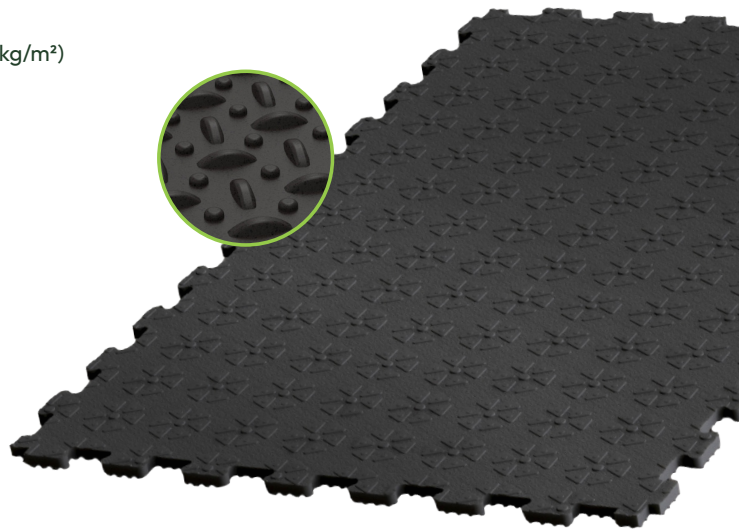

Size
72" (1.83m) × 48" (1.22m)

Surface
Hexagonal Propeller Surface

Underside
Progressive Underside with
Ribbed Perimeter

Weight
4.7 lbs/ft² (20.6 kg/m²)

Designed with meticulous attention to the realities of maintaining a healthy herd while running an efficient dairy operation, Propel is the first performance rubber flooring built to balance the demands of cow behaviour, comfort, and traction - delivering maximum durability and ease of maintenance with zero trade-offs.

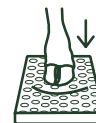

7-point hoof contact
provide superior
traction & reduces slips

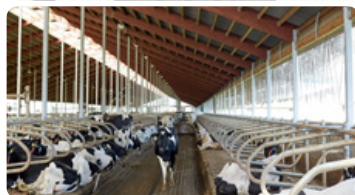

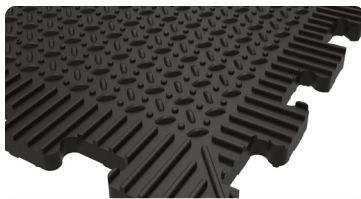

Added support under precision cut
interlocks to prevent moving

Multi-channel
drainage
improves hygiene

7.9mm
deformation for
optimal cow comfort

Key Benefits

- Propel pairs 1" thick durability with the highest comfort rating of any mat in our lineup.
- Hexagonal cells on the surface distribute grip evenly under each foot - matching natural hoof geometry for confident footing at every step.
- Multi-level traction elements within each cell provide layered grip that activates progressively for sure footing on wet or manure-coated surfaces.
- Voids and channels spaced every ~4" (100 mm) in varying widths move liquid off the surface fast - keeping the standing area cleaner with less manual wash down.

Suitable for

Upper Holding Areas |
Crossovers | Parlor Decks |
Walkways | Travel Lanes |
Rotary Platforms
